FOOTER

**Notes:**

- The Question list (A) displays Questions in the database, based on Filter settings and any entered search string.
  - Use a paging control (B) for long Question lists.
  - See *Question Layouts (Lists)* for details about the parts of each Question shown in a list.
- The Question list may be sorted, using the Sort tabs (C).
  - Questions may be sorted by time (labeled as **newest**, most recent first), or doc score (labeled as **score**, highest score first).
    - Newest is the default sort order in Browse mode.
    - Comment dates are ignored when sorting by time.
  - If the list is the result of a search, it may also be sorted by **relevance**, most relevant first. (Details of relevance calculation **TBD.**)
    - This is also the default sort for each new search.
- Click on a Question title (D) to go to the QnA Page.
  - If in Browse mode, title links to the top of the QnA Page.
  - If viewing search results, the title links to the part of the QnA page that contains the displayed snippet.
  - The search box should be cleared on initial visit to a QnA Page from a Question.
