

Question Layouts (Lists)

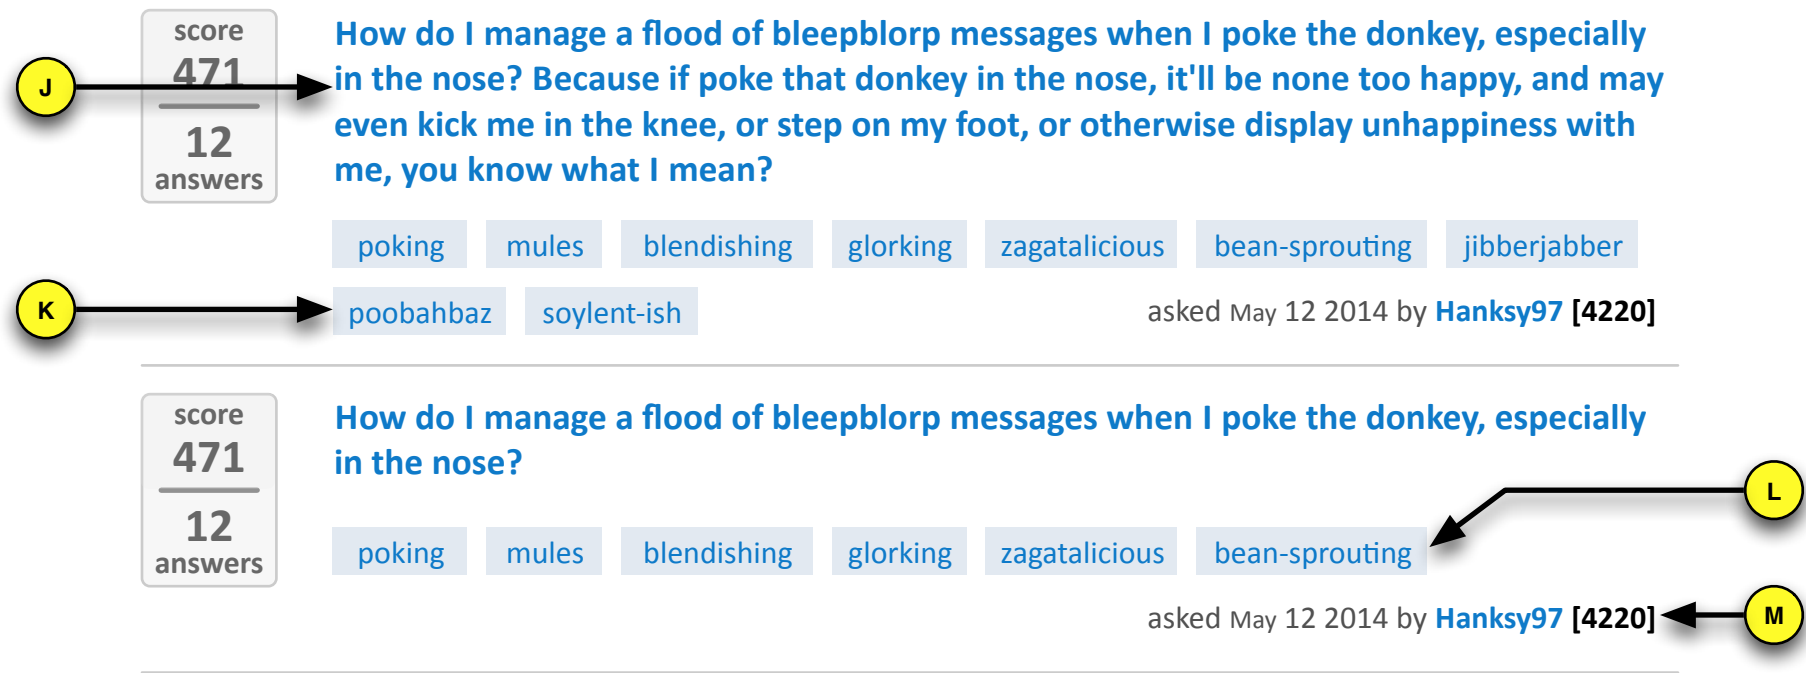

Browse Mode

Search Results

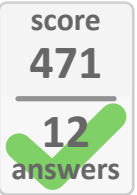

Layout Notes

Notes:

- All Questions displayed in lists contain the following elements:
 - The question text (A)
 - A "summary tile" for the associated QnA doc, showing the Doc Score (B) and the number of answers submitted (C).
 - Questions with an accepted answer are marked:

- The assigned tags (D).
- The date the question was asked (E).
- The asker's display name and their reputation value (F).
- Questions listed in search results use a slightly different layout:
 - A snippet section is added (G), including multiple excerpts that include the found text. (3 excerpts shown here.) Matching text should be **bolded**.
 - Each excerpt should be prefixed with a link (H) to the part of the QnA doc containing the excerpt (i.e. the Question, or one of the Answers).
 - Exact snippet composition details TBD.
- The date of the question or answer (with the reference to the asker or answerer) is shown as appropriate (I).

Layout Notes

- The minimum vertical position of the tags (D) should align to the bottom of the summary tile, but may be pushed down to make room for the snippet (H) for very long questions (J).
- If the number of tags is sufficiently large, they should wrap (K).
- If the last row of assigned tags is sufficiently long (L), the question date and asker's display name should be moved to the next line (M).
