

Ask a Question

- Notes:
- Logged-in users may post questions on the Ask a Question page.
 - The question title is entered in the Title field (A).
 - The question text is entered in the text field (B).
 - Question text should support Markdown syntax.
 - Markdown formatting may be applied using the toolbar (C).
 - Toolbar visual design is **TBD**.
 - Users can switch between editing the question and viewing the formatted version of the question (D).
 - Tags may be added to the question (E).
 - Design shown is based on AngularJS component: <http://mbenford.github.io/ngTagsInput/>
 - Type in the Tags field (F) to reveal a suggestions list (G). (This is the same component used in the Tags filter.)
 - Select a tag to add it to the question (H).
 - Delete a tag by clicking the delete button (I).
 - **NOTE:** Tag candidate list is static; user can NOT define new tags in this field.
 - Click "Post Your Question" (J) to submit the question.
 - If the submit is successful, go to the QnA Page for the Question. (Otherwise display the appropriate alert and stay on this page.)
 - For Guests, replace the contents of this page with a message explaining that only logged-in users can post a question, e.g.:
You must log in to submit a question.
